LIST OF CONTENTS

VOLUME 19 (1991)

Number 1/2

E. Meier, L. Hertz and A. Schousboe	1	Invited Review: Neurotransmitters as developmental signals
Mark P. Mattson and Kurt F. Hauser	17	Critique: Spatial and temporal integration of neurotransmitter signals in the development of neural circuitry
Odile Bourde, Pascal Schmitt and Jean-François Pujol	25	Long term effect of RU24722 on tyrosine hydroxylase protein concentration in the locus coeruleus of mice: differential results in BALB/C, C57BL/6 and their CB6 F1 hybrid
K. Taranath Shetty and Veeranna	33	Thiamine pyrophosphatase in brain. Partial purification, regional distribution and ontogeny
William A. Wolf and Donald M. Kuhn	39	The 5-HT transporter is an additional site of action for the 5-HT agonists RU 24969 and TFMPP
Patrizia Cardelli, Carlo Cangiano, Anna Fiori, Antonia Cascino, Fabrizio Ceci, Filippo Rossi Fanelli and Roberto Strom	45	The methionine analog *S*-methylthiocysteine stimulates neutral amino acid transport by isolated brain microvessels
Marc Nicolet, Martine Verdière-Sahuqué, Albert Villageois, Luis Garcia and François Rieger	51	A glycolipid anchoring domain containing phosphatidylinositol may be involved in the attachment of acetylcholinesterase to frog muscle basal lamina sheaths
Alejandro M. Dopico, Luis M. Zieher, Hugo Rios and Jose Mayo	61	Critical postnatal period for the induction of a long-term increase in the noradrenaline content of rat cerebellum by X-irradiation
Katsuya Morita, Toshihiro Dohi, Shigeo Kitayama and Akira Tsujimoto	71	Mechanism of cyclic AMP facilitation of stimulation-evoked catecholamine release in adrenal chromaffin cells—I. Evidence for enhancement of evoked increase in cytosolic free Na^+ concentration by cyclic AMP elevation
Katsuya Morita, Toshihiro Dohi, Naoki Minami, Shigeo Kitayama and Akira Tsujimoto	81	Mechanism of cyclic AMP facilitation of stimulation-evoked catecholamine release in adrenal chromaffin cells—II. Inhibition of Na^+, K^+-ATPase by cyclic AMP
Seana O'Regan, Serge Birman and François-Marie Meunier	87	Expression of high affinity sodium dependent choline transport in *Xenopus* oocytes injected with *Torpedo* electric lobe mRNA
Françoise Finiels-Marlier, Marie-Jeanne Drian, Alain Privat and Christian Le Peuch	93	Possible involvement of protein kinase C in the development of raphe neurons in primary culture
M. Mbikay, S. Benjannet, C. Gianoulakis, N. G. Seidah and M. Chretien	103	The messenger RNA for pituitary protein 7B2 is widely expressed in mouse CNS and castration reduces its pituitary level
Blair R. Leavitt and Dusica Maysinger	113	Lesions of the nucleus basalis magnocellularis of rat by hemicholinium mustard: protection with monosialoganglioside GM1
Raymond M. Dawson, Margaret H. Dowling and Michael Poretski	125	Assessment of the competition between tacrine and gallamine for binding sites on acetylcholinesterase

Masahiro Nishibori, Ryozo Oishi, Yoshinori Itoh and Kiyomi Saeki — 135 Purification and partial characterization of histamine *N*-methyltransferase from bovine brain

Reinhard Schliebs and Michael G. Stewart — 143 Laminar postnatal development of muscarinic cholinergic receptors in rat visual cortex and the effect of monocular deprivation

M. K. Gaitonde and Elizabeth Murray — 151 Subcellular distribution profile of glucose 6-phosphate dehydrogenase, 6-phosphogluconate dehydrogenase, transketolase and phosphoglucose isomerase in rat brain

M. K. Gaitonde, Elizabeth Murray and A. J. Cross — 159 The effect of 6-aminonicotinamide on the concentration and synthesis of acetylcholine in rat brain

165 Book Reviews

167 News Items

Number 3

Christopher J. Fowler and Gunnar Tiger — 171 Invited Review: Modulation of receptor-mediated inositol phospholipid breakdown in the brain

Stefan R. Nahorski and R. A. John Challiss — 207 Critique: Modulation of receptor-mediated inositol phospholipid breakdown in the brain

German A. Roth and Kunihiko Obata — 213 Experimental allergic encephalomyelitis: dissociation of immunochemical and clinicopathological responses in two strains of rats

Gabriel Fried, Johan Franck, Ernst Brodin and Lars Terenius — 221 Subcellular distribution of two enzymes with neuropeptide converting activity in rat spinal cord

J. Gottfries, P. Fredman, J.-E. Månsson, E. Hansson and L. Svennerholm — 227 Ganglioside characterization of rat astroglial cells in primary culture: detection of the ganglio and lacto series gangliosides

Jorg Steinbach and Reinhard Schliebs — 235 Kainic acid-induced convulsions affect phorbol ester binding to protein kinase C and *in vitro* protein phosphorylation in rat amygdala and piriform cortex

K. P. Gudehithlu, A.-M. Duchemin, D. A. Dalia, N. H. Neff and M. Hadjiconstantinou — 243 Age-related changes in the expression of the glutamate transporter from rat cerebral cortical poly A(+) mRNA in *Xenopus laevis* oocytes

Yoshihisa Kitamura, Xue-Hui Zhao, Makiko Takei, Osamu Yonemitsu and Yasuyuki Nomura — 247 Effects of antidepressants on the glutamatergic system in mouse brain

Michihisa Tohda, Chihiro Kumagai and Yasuyuki Nomura — 255 Effects of the simultaneous application of dibutyryl cAMP and phorbol ester on morphological differentiation in NG108-15 cells

Jose A. Aguirre, Kjell Fuxe, Barbro Tinner, Beth Andbjer, Luigi F. Agnati and Peter Eneroth — 261 On the role of neuropeptide Y receptors of the Y_2 type in the control of hypothalamic catecholaminergic mechanisms and neuroendocrine function. Central effects of the NPY fragment (13–36)

Fabio Benfenati, Kjell Fuxe and Luigi F. Agnati — 271 Ganglioside GM1 modulation of calcium/calmodulin-dependent protein kinase II activity and autophosphorylation

Daniel K. Hartline and Robert W. Newcomb — 281 Simulation of peptide processing, compartmentation and release in neurosecretory cells

Robert W. Newcomb, Daniel K. Hartline, Jean-Georges Lorentz, Antoine Depaulis and Jean J. Nordmann	297	Quantitative analysis and computer simulation of oxytocin-neurophysin processing in the rat neurohypophysis
Riccardo Ientile and Caterina Fabiano	313	Polyamine interconversion in rat retina: effect of intravitreous administration of methylglyoxal bis[guanylhydrazone]
Tsuyoshi Ueha and Kinya Kuriyama	319	Direct action of ethanol on cerebral $GABA_A$ receptor complex: analysis using purified and reconstituted $GABA_A$ receptor complex
Osamu Shibata, M. H. Richards, Robert C. Miller and W. Lovenberg	327	The influence of CO_2 and low potassium concentrations on inositol monophosphate levels in rat hippocampal prisms
C. Usuki-Ito, M. Muramatsu, S. Chaki, S. Okuyama and S. Otomo	335	Biochemical and autoradiographic studies of specific [^{3}H]minaprine binding to rat brain slices
Tsukasa Sakurada, Pierre Le Grevès and Lars Terenius	341	Fragmentation of calcitonin gene-related peptide and substance P in the rat central nervous system
S. Benyhe, M. Szücs, E. Varga, A. Borsodi and M. Wollemann	349	Effects of 5′-guanylylimidodiphosphate on the ligand binding of membrane-bound and solubilized opioid receptors of frog (*Rana esculenta*) brain
M. Sbia, M. Synguelakis, G. Le Gal la Salle and N. Morel	355	Tubulin distribution along the Torpedo electromotoneuron. An immunochemical study
Eminy H. Y. Lee	363	Effects of tryptophan administration on tetrahydrobiopterin level in rat caudate nucleus
Peter S. Widdowson and R. Bruce Holman	367	Effects of substance P on endogenous dopamine release from rat striatum *in vitro*
Masaaki Hirouchi, Seitaro Ohkuma and Kinya Kuriyama	375	A Rapid Publication: Expression of mRNA for $GABA_A$ receptor α_1-subunit in mouse brain
	383	Book Reviews
	387	News Items

Number 4

G. J. Kilpatrick, N. M. Barnes, C. H. K. Cheng, B. Costall, R. J. Naylor and M. B. Tyers	389	The pharmacological characterization of 5-HT_3 receptor binding sites in rabbit ileum: comparison with those in rat ileum and rat brain
Suzanne Trumpp-Kallmeyer, Anne Bruinvels, Jan Hoflack and Marcel Hibert	397	Recognition site mapping and receptor modelling: application to 5-HT receptors
N. N. Osborne and H. Ghazi	407	5-HT_{1a} receptors positively coupled to C-AMP formation in the rabbit retina
M. Riad, S. El Mestikawy, D. Vergé, H. Gozlan and M. Hamon	413	Visualization and quantification of central 5-HT_{1A} receptors with specific antibodies

Daniel Vergé, Line Matthiessen, Genevieve Daval, Yannick Bailly, Hossein K. Kia and Michel Hamon — 425 — Localization of 5-HT$_{1A}$ serotonin receptors in the cerebellum of young rats

H. Nquyen, H. H. Le, R. Y. Lee, M. Staufenbiel, J. M. Palacios, G. Mengod and H. Lübbert — 433 — Does alternative exon usage contribute to serotonin receptor heterogeneity?

E. Schlicker, T. Glaser, G. Lümmen, A. Neise and M. Göthert — 437 — Serotonin and histamine receptor-mediated inhibition of serotonin and noradrenaline release in rat brain cortex under nimodipine treatment

John W. Commissiong, Alan Tenenhouse and Margaret Warner — 445 — Commentary: Specificity and the reliability of quantitation in the analysis of neurotransmitters

M.-C. Miquel, E. Doucet, C. Boni, S. El Mestikawy, L. Matthiessen, G. Daval, D. Vergé and M. Hamon — 453 — Central serotonin$_{1A}$ receptors: respective distributions of encoding mRNA, receptor protein and binding sites by *in situ* hybridization histochemistry, radioimmunohistochemistry and autoradiographic mapping in the rat brain

Angus Grieve, John Dunlop, Arne Schousboe and Roger Griffiths — 467 — Kinetic characterization of sulphur-containing excitatory amino acid uptake in primary cultures of neurons and astrocytes

Bo Belhage, Inge Damgaard, Else Saederup, Richard F. Squires and Arne Schousboe — 475 — High- and low-affinity GABA-receptors in cultured cerebellar granule cells regulate transmitter release by different mechanisms

Dasan Luo, William K. Stell and Anny Cupo — 483 — Synthesis and post-translational processing of proenkephalin in light- and dark-adapted chicken retinas

Risto A. Kauppinen, Stephen R. Williams, Keith J. Brooks and Herman S. Bachelard — 495 — Effects of ammonium on energy metabolism and intracellular pH in guinea pig cerebral cortex studied by ^{31}P and ^{1}H nuclear magnetic resonance spectroscopy

Annika Lekman, Bengt Hagberg and Lars Svennerholm — 505 — Altered cerebellar ganglioside pattern in Rett syndrome

Jill E. Maddison, Wendy E. J. Watson and Graham A. R. Johnston — 511 — Cerebellar [^{3}H]kainate and [^{3}H]AMPA binding in dogs with congenital portosystemic encephalopathy

Lois Winsky and David M. Jacobowitz — 517 — Radioimmunoassay of calretinin in the rat brain

Dai-Eun Sok and Mee Ree Kim — 523 — Release of *p*-nitrophenyl phosphorylcholine-hydrolyzing phosphodiesterase from mouse brain membrane by phospholipase-C

Talmage R. Bosin and Gregory C. Kasper — 531 — Stimulation of platelet serotonin and $^{86}Rb^{+}$ uptake by *N*-ethylmaleimide

W. Araki, S. Nakamura, S. Tanaka, J. Kimura and K. Ueda — 537 — Separation of protease activity from acetylcholinesterase of the electric eel

Abraham L. Frankhuijzen, Frank P. Jansen, Anton N. M. Schoffelmeer and Arie H. Mulder — 543 — μ-Opioid receptor-mediated inhibition of the release of radiolabelled noradrenaline and acetylcholine from rat amygdala slices

Scott T. Cain, Raymond F. Akers and Aryeh Routtenberg — 549 — Functional regulation of brain pyruvate dehydrogenase: postnatal development, anesthesia and food-deprivation

Romain Girod, Françoise Loctin and Yves Dunant — 559 — Effects of vesamicol on acetylcholine metabolism and synaptic transmission in the electric organ of *Torpedo*

Marta A. Piva, Jorge H. Medina and Clara Peña — 567 — Uptake of n-butyl-β-carboline-3-carboxylate by rat cerebral cortex

Lidia Faff-Michalak, Urszula Wysmyk-Cybula and Jan Albrecht	573	Different responses of rat cerebral mitochondrial 2-oxoglutarate dehydrogenase activity to ammonia and hepatic encephalopathy in synaptic and nonsynaptic mitochondria
Lynne R. de Souza and Juta K. Reed	581	The involvement of ecto-ATPase activity in the phosphorylation of intracellular proteins by the addition of extracellular [^{32}P]ATP in PC12 cells
J. Siciliano, C. Laborde and L. Barbeito	593	*N*-Acetyl-aspartyl-glutamate in the rat dorsal striatum: topographical distribution and effect of sensorimotor cortex lesions
D. S. Dunlop, H. Kaufman and A. Lajtha	601	The relation of protein synthesis to the concentrations of free and membrane-bound ribosomes in brain at different ages
Ihsan H. S. Al-Deen and Graham G. Shaw	605	Circadian variation in cerebral spermine and spermidine concentrations in entrained and free-running mice
Delia L. Bernik, Emilio A. Rivas and Georgina Rodriguez de Lores Arnaiz	611	Fusion between rat brain synaptosomes and phosphatidylserine liposomes
	619	Book Reviews
	621	News Items
